

Full Stack Developer

(Web & Mobile Applications)

LightBlue reconciles sustainability with business excellence, capitalizing on our unique 8 years of practical expertise in the field of Food Waste Prevention, and 12 years in sustainability performance.

What are we expecting from you?

Selection Criteria:

- As a Full Stack Developer, you will play a crucial role in our development team, focusing on our existing mobile and web applications. Your primary responsibility will be to ensure the continuous improvement and maintenance of these applications, implementing new features, optimizing performance, and ensuring scalability. Working closely with our team, you will leverage your expertise to enhance user experience, address technical challenges, and contribute to the strategic direction of our digital products.

Key Responsibilities:

- Mobile Application Development:
 - Maintain and enhance our mobile application developed in React Native.
 - Ensure the performance, quality, and responsiveness of the application.
 - Collaborate with the team to define, design, and ship new features.
 - Fully utilize JavaScript to implement both front-end and back-end services.
- Web Application Development:
 - Develop and maintain our web application with a focus on functionality and user experience.
 - Write clean, scalable code using C#, HTML + Razor, JavaScript, SCSS, and TypeScript.
 - Ensure cross-platform optimization for mobile phones and responsiveness of applications.
 - Collaborate with designers to bring seamless user interfaces to life.

Must to Have:

- Proven experience as a Mobile Application (iOS, Android) and Web Application Developer.
- Strong knowledge of web and mobile development technologies, including
 - Javascript, C#,HTML, SCSS, TypeScript, Git.
- Experience with React Native for mobile app development.
- Good problem-solving skills.
- Strong communication skills with proficiency in English to collaborate effectively with the team.
- A bachelor's degree in Computer Science, Engineering, or related field is preferred.

Nice to Have:

- Experience with database management and proficiency in SQL for querying and manipulating data.
- Prior experience in an Agile development environment, contributing to sprint planning, stand-ups, and retrospectives.
- Certification in English language proficiency (e.g., TOEFL, IELTS, TOEIC or equivalent), which demonstrates a high level of proficiency in both written and spoken English

**You don't fit these requirements but feel it's for you?
send us a 3 min video explaining why YOU are the one.**

What do you get from us?

What We Offer:
