LIGHTBLUE

Junior Consultant
(Thai national)

LightBlue Environmental Consulting Co., Ltd is offering a unique opportunity for a highly motivated young professional to join our pioneer social enterprise. Our mission is to reconcile business excellence with sustainability and help address global issues (SDGs 2, 12 and 13).

Looking to work for an organization that makes the planet a main shareholder and encourages a circular economy?

Keen to expand your career, acquire skills in capacity building, consulting, and technology, and apply it to help businesses fix one of the most detrimental issues faced by our society?

What are we expecting from you?

Responsibilities:

Training & Capacity building 50%
- Support clients in implementing food waste monitoring system, including onsite visits to help them set up the FIT tech in their kitchens whenever applicable
- Deliver capacity building training to clients on (1) awareness raising on the food waste issue and (2) how to implement a food waste monitoring system and use FIT data present findings and suggestions to clients with justifications and practical advice
- Perform any other business development-related tasks as required by LightBlue, such as identify government grants, related events, publications, and announcements, that could support the go-to-market strategy or benefit our customers

Project Management 50%
- Plan and/or execute assigned projects according to client's needs and requirements (design, preparation, implementation and follow up)
- Formulate recommendations and solutions with attention to clients' requirements, capabilities and limitations, forming customised reports
- Present findings and suggestions to LightBlue management with justification and practical advice
- Design deliverables content in response to client needs and strive to develop quality deliverables through verification and validation of results
- Develop project management and consulting skills, ultimately serving as day-to-day client contact for projects, including data requests and data management
- Support clients in implementing food waste monitoring system, including onsite visits if required and applicable
- Ensure the project is on track and all milestones are met under supervision from project manager and senior associates
- Updating the CRM to ensure clear and timely management

**Helping to achieve the UN SDGs
since 2012**

Who are we looking for?
