

IT Project Manager

Keen to use your IT expertise and management skills to help businesses fix one of the worst issues faced by our society?

LightBlue is a UN-awarded food waste prevention tech and consultancy established in Bangkok since 2012. We've been at the forefront of sustainability, working with top-tier clients like Marriott, Hyatt, Accor, GIZ, and Michelin Guide across 30+ countries.

Our star solution, FIT tech, is currently deployed in hundreds of commercial kitchens, and is going through major and exciting upgrades. Our ambition is to become a global leader in food waste monitoring tech, nothing less.

What are we expecting from you?

KEY RESPONSIBILITIES:

- **App Development & Maintenance (70%)**
 - Lead and oversee the ongoing development of the FIT App (web & mobile) to ensure it meets the highest standards of functionality, performance, and scalability.
 - Collaborate closely with the development team, ensuring agile methodologies are followed and deadlines are met.
 - Coordinate app updates, feature releases, and bug fixes, ensuring smooth deployment processes.
 - Manage external development partners and ensure alignment with internal goals and technical requirements.
 - Work closely with UX/UI designers to ensure the app provides a seamless and engaging user experience.
 - Regularly monitor app performance and user feedback, driving continuous improvement.
 - Take the lead on the FIT Project's long-term development, ensuring that technical decisions align with the bigger picture and future growth of the platform.
- **Project Management (30%)**
 - Develop and manage project timelines, budgets, and resource allocation for IT projects.
 - Maintain clear documentation of project milestones, issues, risks, and solutions.
 - Ensure projects meet quality standards, remain within scope, and are delivered on time.
 - Foster open communication with internal stakeholders, providing regular project updates and managing expectations.
 - CRM Management: Maintain and update the CRM system to ensure effective and timely project management.

Helping to achieve the UN SDGs
since 2012

Who are we looking for?

Qualifications:

- Bachelor's or Master's degree in Computer Science, Information Technology, Engineering, or a related field.
- 3+ years of experience in IT project management, with a focus on software development, ideally in mobile or web applications.
- Technical Expertise:
- Strong understanding of Python (including libraries such as Pandas, NumPy) for data processing and analysis.
- Proficiency in SQL and database management (e.g., MySQL, PostgreSQL).
- Experience with Google Cloud Platform, JavaScript, C#, HTML, SCSS, TypeScript, Git.
- Knowledge of cloud infrastructure, APIs, and database design.
- Agile Methodologies: Certified in SCRUM or other agile frameworks.
- Strong leadership and organizational skills, with proven experience managing internal and external development teams.
- Ability to see the bigger picture, driving strategic decisions that align with long-term project goals.
- Excellent communication skills, capable of translating technical requirements into clear project objectives for non-technical stakeholders.
- Fluent in English (TOEIC score 750 minimum).
- A passion for technology and sustainability is a plus!

Who are we looking for?

- Salary starting from 70k THB (depending on qualification, skills and experiences)
- 15 days of Public Holidays + TGIF (1 afternoon off/month) + Vacation leaves
- Join a young team, in a brand-new office in the heart of Bangkok, walking distance to BTS ChongNonsi, food and shopping malls.
- A culture that values innovation, teamwork, and foster professional growth.
- Serious credentials, working with a pioneer food waste hacking tech and consulting company
- Social Security
- Working time: Mon-Fri 9am to 6pm.

Starting date: ASAP

Working location: Bangkok Office
